Education

BSc Computing, IT and Mathematics

The Open University
2021 - 2024

BEng Aeronautical Engineering with IFY

Brighton University
2017 – changed career

Experience

React.js Developer

Learn&Co
January 2022 – July 2022

This opportunity accelerated my learning as a developer where I coded multiple reusable components and pages using React.js. I was able to integrate API which was an achievement. Working in a team expanded my understanding of git and I was able to deliver all the tasks assigned to me before the deadline.

I was able to master state management, props and hooks, while continuing to educate myself on more complexed code. This whole project was made using SCSS and responsive across all devices.

Personal Projects

World API

I acquired the understanding of API and how to fetch data, which I was able to execute on my job. I developed reusable components through which I could pass data as props and render using map and filter function. This project is made to be responsive across all devices.

Education

BTEC Engineering Level 3 National Diploma

Distinction Merit
2014 – 2016

Skills & Interests

Computer: React.js, JavaScript, CSS, HTML, Figma, Microsoft Office, Notion and Jira.
Interests: Nutrition and fitness, playing ukulele, psychology and philosophy.
